

**IN THE CLAIMS**

Please cancel pending Claims 45-51 without prejudice.  
Please amend the remaining claims as follows:

1. - 51. (Cancelled)

52. (Currently Amended) A method for treating a subject ~~afflicted with or susceptible to a cardiovascular disorder having heart failure post-acute myocardial infarction,~~ comprising administering eplerenone, ramipril and a loop diuretic to the subject, wherein:

the daily dose amount of eplerenone administered to the subject is from about 1 mg to about 400 mg, and

the daily dose amount of ramipril administered to the subject is from about 1 mg to about 200 mg, and

the daily dose amount of the loop diuretic administered to the subject is from about 1 mg to about 200 mg.

53. (Previously Presented) The method of Claim 52 wherein the loop diuretic is furosemide.

54. (Previously Presented) The method of Claim 52 wherein the daily dose amount of eplerenone administered to the subject is from about 2 mg to about 150 mg.

55. (Previously Presented) The method of Claim 52 wherein the daily dose amount of eplerenone administered to the subject is selected from the group consisting of 25 mg, 50 mg, 100 mg, and 150 mg.

56. (Previously Presented) The method of Claim 52 wherein the daily dose amount of ramipril administered to the subject is from about 2 mg to about 150 mg.

57. (Previously Presented) The method of Claim 52

wherein the daily dose amount of the loop diuretic administered to the subject is from about 5 mg to 150 mg.

58. (Previously Presented) The method of Claim 52 wherein the daily dose amount of eplerenone administered to the subject is from about 2 mg to about 150 mg; the daily dose amount of ramipril administered to the subject is from about 2 mg to about 150 mg; and the daily dose amount of the loop diuretic administered to the subject is from about 5 mg to about 150 mg.

59. (Previously Presented) The method of Claim 52 wherein at least two of the eplerenone, ramipril and loop diuretic are administered in a sequential manner.

60. (Previously Presented) The method of Claim 52 wherein the eplerenone, ramipril and loop diuretic are administered in a substantially simultaneous manner.
